PROFILE

Cross-functional nonprofit operator with experience turning complex programs into clear, reliable systems. Combines program delivery, data infrastructure, digital tools, recruitment, community engagement, and funding operations to help small teams scale their impact.

EXPERIENCE

Tech2Peace | Operations, Systems & Resource Development Lead

May 1, 2021 - September 30, 2026

Official title: Community Manager / Tech Coordinator | Ramallah / Hybrid

- Led end-to-end delivery of 20+ ten-day residential seminars for 24-30 participants, coordinating logistics, participant experience, instructors, vendors, travel, and cross-functional execution.
- Built and administered an organization-wide Airtable CRM and operations database with 10,000+ records covering applicants, 700+ alumni, attendance, events, grants, donations, expenses, and follow-ups.
- Designed and maintained Zite and Fillout tools connected to Airtable, including recruitment, staff contracts, fundraising, organization data, event registration, and feedback-analysis dashboards.
- Managed Google Workspace, WordPress/Elementor, Mailchimp, forms, automations, access controls, knowledge systems, and operational documentation across the organization.
- Planned approximately 40 alumni events annually and managed outreach, applications, screening, interviews, onboarding, payments, travel documentation, and participant communications.
- Directed the technical track, supervised 3-4 instructors per seminar, taught workshops, and contributed to curriculum development and quality assurance.
- Coordinated funding research, grant writing, portal submissions, donor reporting, CRM tracking, donation reconciliation, and supporting documentation, contributing to €60K+ in secured funding.

SELECTED SYSTEMS & IMPACT

Recruitment operations: application-to-onboarding workflow, interviews, payments, visas, and status reporting | **Fundraising operations:** opportunity pipeline, deadlines, follow-ups, donor records, donations, and reporting | **Data and learning:** organization dashboards, event master lists, feedback analysis, and year-over-year reporting

SELECTED PROJECTS

Independent demonstration projects developed with AI coding assistance | React, TypeScript, CSS

Survey Insights Studio

Interactive survey dashboard with validated CSV import, filters, rating charts, response counts, and averages.
Includes missing-answer handling and filtered CSV export; imported data stays in the browser tab.

Freelancer Project Hub

Browser-based workspace for projects, clients, task checklists, stages, deadlines, and budgets.
Includes search and overdue filters, localStorage saving, and validated JSON backup and restore.

EDUCATION

B.A. Computer Science, Minor in Media & TV | Al-Quds Bard College
